May Meeting

This month's club meeting is on
May 21 at 7:30PM.

From the President

Welcome to Spring 2012!

As many of you know I am a jeweler and work for Schwanke-Kasten Jewelers and we are the only jeweler in the state that sell Breitling Watches. Breitling has been a huge sponsor of everything aviation throughout their history. I came across the following article about another Breitling sponsored flyer. Don't we all wish we could do this?

A handwritten signature in black ink that reads "Steve Tarney".

Steve Tarney,
President Astrowings of Wisconsin

April Meeting Highlights

Astrowings Field Hours

Fuel Planes

Mon-Fri 10AM-Dusk

Sat-Sun 10AM-5PM

Electric Planes

All week 8AM-Dusk

Pilots must sign in and out of the flight log for each flying session

During summer months grass cutting is done every Friday morning and no flying is permitted during this time.

Astrowings Flight Instructors

Airplanes Only

Cedarburg:

Gary Keup 262-375-4831

Fox Point:

Steve Tarney 414-351-5015

Glendale:

Sky Sessions 414-810-6812

Milwaukee:

Jim Hendrickson 414-358-9501

Oostburg:

Aaron Cochran 414-365-1571

Port Washington:

Ben Baumann 262-244-6241

John Collins 262-268-0859

Matt Komro 414-378-2022

President's Welcome

The Astrowings membership meeting of 04/16/2012 was called to order at 7:30 pm by President Steve Tarney.

Field Condition

Great spring condition. Thanks to Steve and Scott the golf cart is now available. The yellow rope has been replaced and we now have a brand new grill. The field has been rolled and cut. Weed control has been arranged.

Treasurer's Report

The treasure's report was read and approved.

Old Business

We received a \$30 check from the Milwaukee R/C Association for volunteers from our club: Steve Tarney, Mike Thurner and Tony D'Alessio. Each received a certificate from the association.

Bob Ryan reported on the R/C Associations's spring meeting.

A motion to accept the old business was made and passed.

New Business

Jim Hendrickson reported that our Fun Fly charity event will be to benefit the Boy Scouts Troop 840. They will handle food sales and parking.

Officers received spiffy new AMA patches with their title on them.

Show and Tell

Jim Hendrickson explained the ins and outs of his Panther Ducted Fan.

Gary Keup let us in on the list of things he had to do to get Steve's

old crashed plane flight worthy.

Russ Whitford showed his magnificent indoor free flight planes that he scratch-built.

And The Raffle Winners Are

Jesse Mosca wins the new Horizon MQX Quad Copter with AS3X as a BNF. If you want more initials you need to talk to Jesse.

Steve Tarney is now the proud owner of a bag of Dean's Ultra Plugs in a bag that was unfortunately printed upside down. Steve closes his eyes and savors the moment.

Scott Orten picks the box wrapped in our local news rag and hoped for a hot prize. And, he wins a hot air gun!

Russel Fenstermaker maintains his winning ways as he holds up his bag o' shrink tubes.

Jeremy Pitchford is a double winner with Hobblyite Filler and Glow plug socket with handy banana plugs. Careful where you put those Jeremy.

The Great AstroWings Heli Race

Jim Hendrickson, Steve Tarney and Jeremy Mickelson during pre-race setup in the pits.

Jim and Steve drag race to the first hoop.

Steve gives new meaning to flying on manual.

Steve wins first place with some skillful piloting and some sleight of hand.

Jeremy wins the second place bag, but is reluctant to reveal its contents.

Jim brings up the rear to do his best Carol Merrill with Deans Ultra Plugs in a non-defective bag.

Jetman!

The Amazing Story of Yves Rossy

By now, most everyone has heard of Yves Rossy, or at least his more famous label “Jetman”. Yves has made many impressive flights including through the Alps, into and across the Grand Canyon and across the English Channel, all without the use of an airplane. He’s made all his exciting flights strapped to a jet-powered wing of his own design. Yves’ creation allows him to fly free from any type of control system. His head, shoulders, arms and legs act like the rudder, elevator and ailerons. It’s amazing to listen as Rossy share his experience and thrill of flying without an aircraft.

a span of about 2.4 meters (7.9 ft) and it is powered by four JetCat P200 turbine jet engines modified from large model aircraft. The first successful flight occurred in November 2006. The JetCat P200 engines each produce about 22 kilograms (48.5 pounds) of thrust and feature automatic start (25 second sequence). The entire system weight 121.25 pounds (with 30 liter fuel.) The engines run on a mix of kerosene and 5% of turbine oil for lubrication. For instruments I have an altimeter and a clock so I can keep track of fuel amount. I can fly under power for 8 to 10 minutes.

Safety Features?

There is no control surfaces at all. To maneuver I arch my back to go up and push my shoulders and head forward to go down. I use my entire body and have to make quick adjustments to react very quickly to things. I can continue to fly on two engines but if I lose engines on one side, it produces a roll. I have a main and reserve parachute and a quick release harness to separate myself from the wing. When I pull the release ring, it also automatically shuts off the engines and deploys the wing’s rescue chute.

How did this all start?

Yves Rossy: For several decades, I has wanted to fly like a bird, with a minimum of instruments but with the ability to steer myself. I was skydiving and I discovered “free falling,” where you tuck into a position and feel like you are flying. This is as close to the dream as possible except you go straight down. I wanted to move the vector to horizontal. After experimenting with sky surfers (1993-1998), a wing suit and an inflatable wing (1999-2003), I had the idea to power a wing using model aircraft jet engines. I took many small steps until you see what I have now.

Tell us about your wing.

My system consists of a back pack with semi-rigid aeroplane-type carbon-fiber wings. It has
